Mature Update Registration

for American Miniature Mediterranean and Miniature Donkeys

(for animals that are in the temporary register
and have reached the age of 3 years)

Temporary registration of all Miniature Donkeys lapses after 3 years as some may grow over 36 in height. **After the third birthday, all Miniature Donkeys must have their certificates re-issued for either the Miniature Registry, or the Standard Registry if over height. No foals can be registered from the temporary registered sires or dams.**

The re-issue will then show the animal's mature height, mature photos and any colour or other changes. **Please print Clearly**
